Art Unit: 1763

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1 and 2 are rejected under 35 U.S.C. 102(e) as being anticipated by Tochishita (6,280,792). Tochishita (see Figs. 1 and 8-10) discloses a deposited-film forming apparatus comprising an evaporating section 42 for a metal such as aluminum, zinc or tin, and a plurality of tubular barrels of a stainless steel mesh net for accommodating rare earth based magnets. The evaporating section and tubular barrels are mounted in a vacuum coating chamber. The tubular barrels are detachably supported by support shafts 4 provided at each side of each tubular barrel, as now claimed, outside of a horizontal rotational axis of a support member (driving disk unit 51, for example, see col. 10, lines 45-46) rotatable about the horizontal rotation axis, so that the distance between the tubular barrel and the evaporation section is varied by rotating the support member.

Claims 1 and 2 are rejected under 35 U.S.C. 102(a) as being anticipated by Tochishita (EP 0992605). The previous art rejections have been removed in view of applicants' amendments and the accompanying arguments.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
